Caring Coders

Animal Survival Challenge #2
Create the habitat your animal lives in and animate one way it needs to survive.

Make a plan:

Sketch the environment. (choose a background and include plants and other details as sprites.)	Brainstorm ways the animal has to survive in it's environment. List here:
Design one way the animal survives and how you will animate it.	In what way could this become a game? Write your idea below:

In Scratch,
- ❏ Add a new background
- ❏ Create background sprites as environmental details.
- ❏ Animate a survival action.
